1. The following information is submitted in reply to memorandum from Mr. [REDACTED] dated 16 March 1956, 25X1A9a subject as above.

2. One hard binder set (blue) is furnished with the first section published for each NIS Area. The name of the area is printed on the front binder. This set will accommodate additional NIS Sections until the total reaches a thickness of approximately 2 1/2 inches at the binding edge, whereupon another set is sent with the next published NIS element. Additional sets are issued on the same basis. It is my understanding that [REDACTED] 25X1X7 been receiving the NIS binders in accordance with this procedure.

25X1A9a 3. It will be noted that these binders are issued only with every 2 1/2 inches of published NIS, and not with every published NIS element. This may have given cause for misunderstanding on [REDACTED] 25X1X7 However, if [REDACTED] desires additional binders, they may be obtained by submitting a request to OCR through the [REDACTED] 25X1X7 The request should specify the NIS Area, or country, and number of binder sets desired for each area.
